

## Installation of Python software

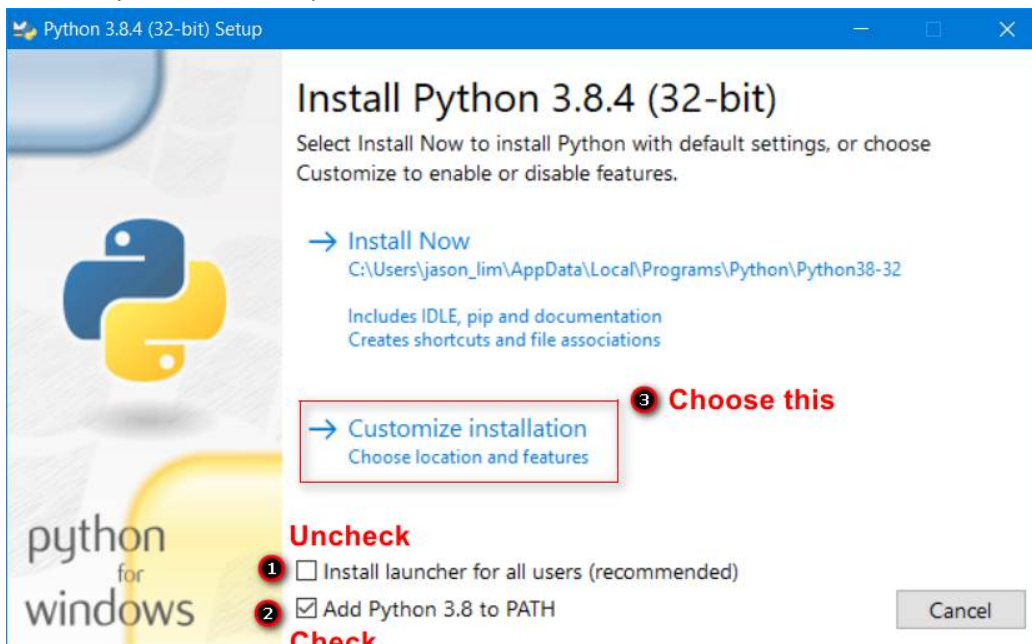

- a. Download the file “**Python-3.8.4.exe**” file from <https://www.python.org/ftp/python/3.8.4/python-3.8.4.exe>

Note: Any python installation that is version 3 can be used for this course.

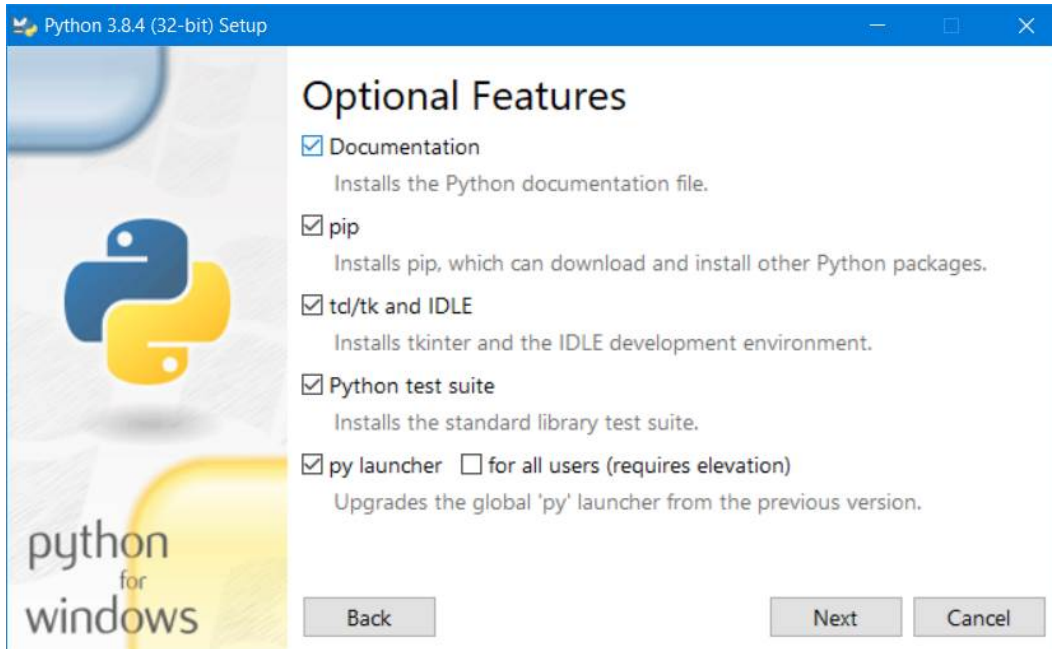

**By default, it is trying to allow all users, thus needing Admin rights**

- b. At the “Python 3.8.4 Setup” window, Click at “**Customize Installation**”

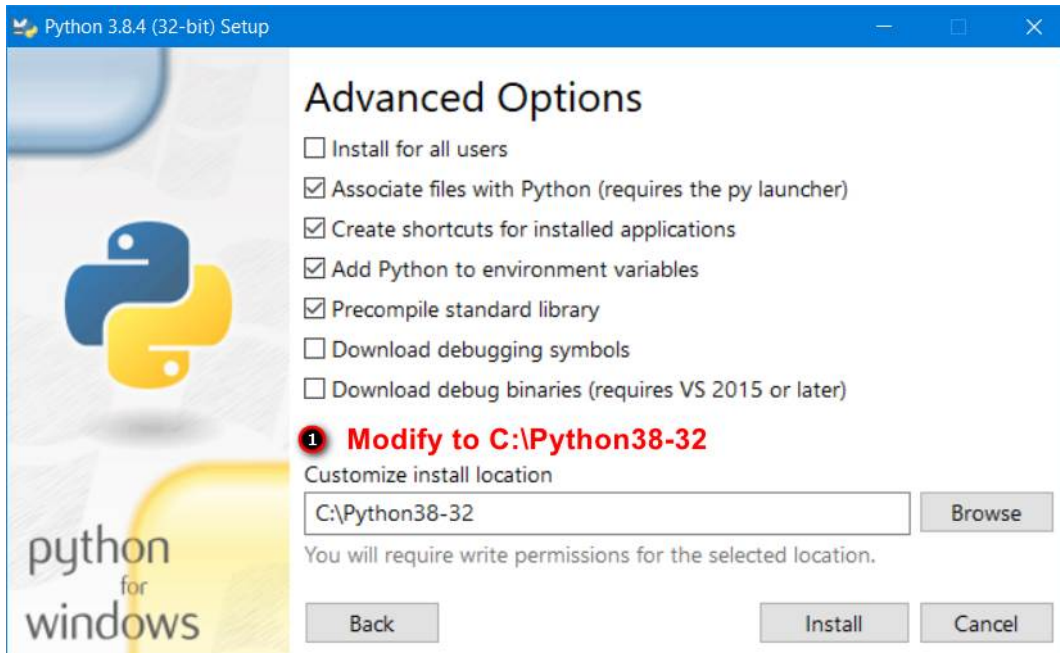

**We'll customised the installation**

- c. Accept the default and click “**Next**”.

**We'll go with the default settings**

- d. Under Customize install location, choose **C:\python38\** and click “**Install**”.

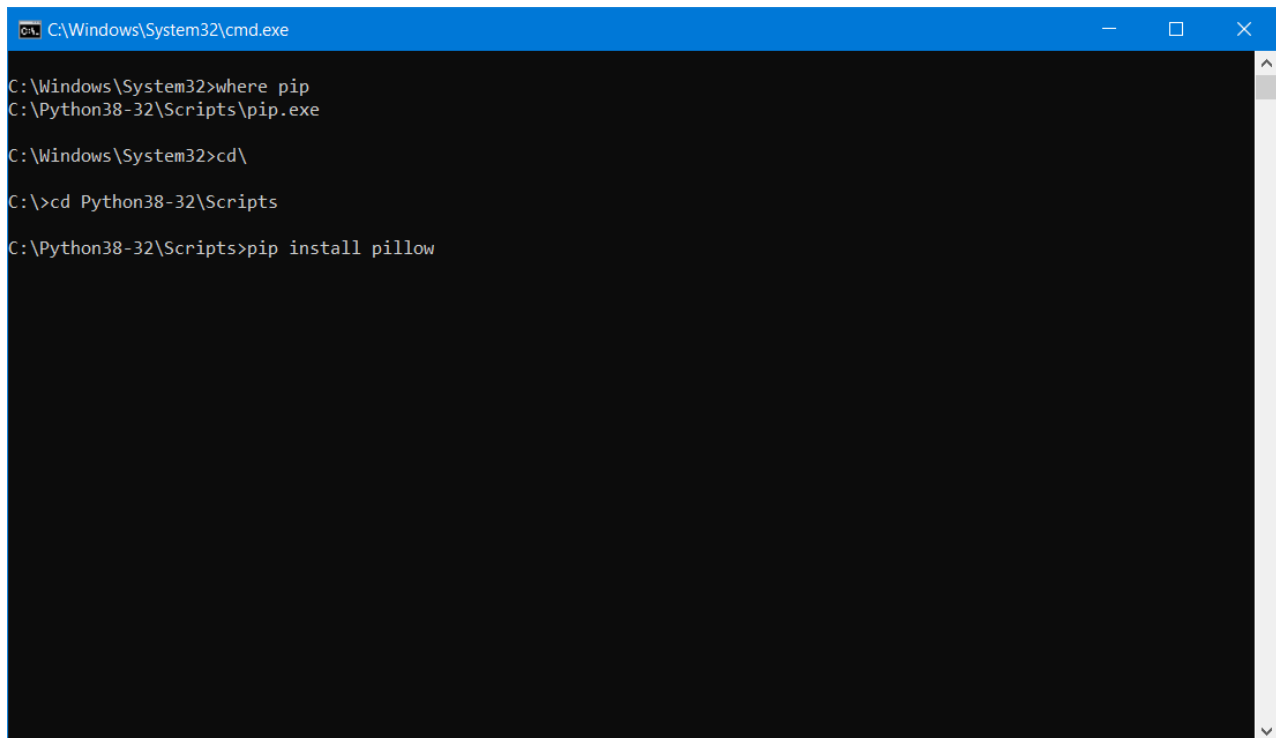

**Recommended to place it in an easy-to-access location**

- e. When the Python 3.8.4 is successfully installed. Click “**Close**”.

## Testing pip install

- a) Pip install is required for installing additional packages to enhance the python software. The instruction given below is to test that you are able to execute the command without issue.
- b) Open a command prompt,
  - i. Type **where pip**
  - ii. Take note of the folder that pip.exe is located (C:\Python38-32\Scripts in the example below)
  - iii. Type **cd C:\Python38-32\Scripts** (change according to where pip.exe is located on your system)
  - iv. type the following command: **pip install pillow**

```
C:\Windows\System32\cmd.exe
C:\Windows\System32>where pip
C:\Python38-32\Scripts\pip.exe

C:\Windows\System32>cd\
C:\>cd Python38-32\Scripts
C:\Python38-32\Scripts>pip install pillow
```

- v. If you do not see any error message, it means that you have no issue installing additional python packages.

## Installing of Wing Personal Python IDE

- c) Download the file “wing-personal-7.2.3.0.exe” from <https://wingware.com/pub/wing-personal/7.2.3.0/wing-personal-7.2.3.0.exe>

## Wing Personal - Version 7.2.3 - Released 2020-07-13

Wing Personal is a free Python IDE designed for students and hobbyists. It omits many features found in Wing Pro. [Compare Products](#)

Wing Personal is free to use for any purpose and does not require a license to run.

Click NEXT

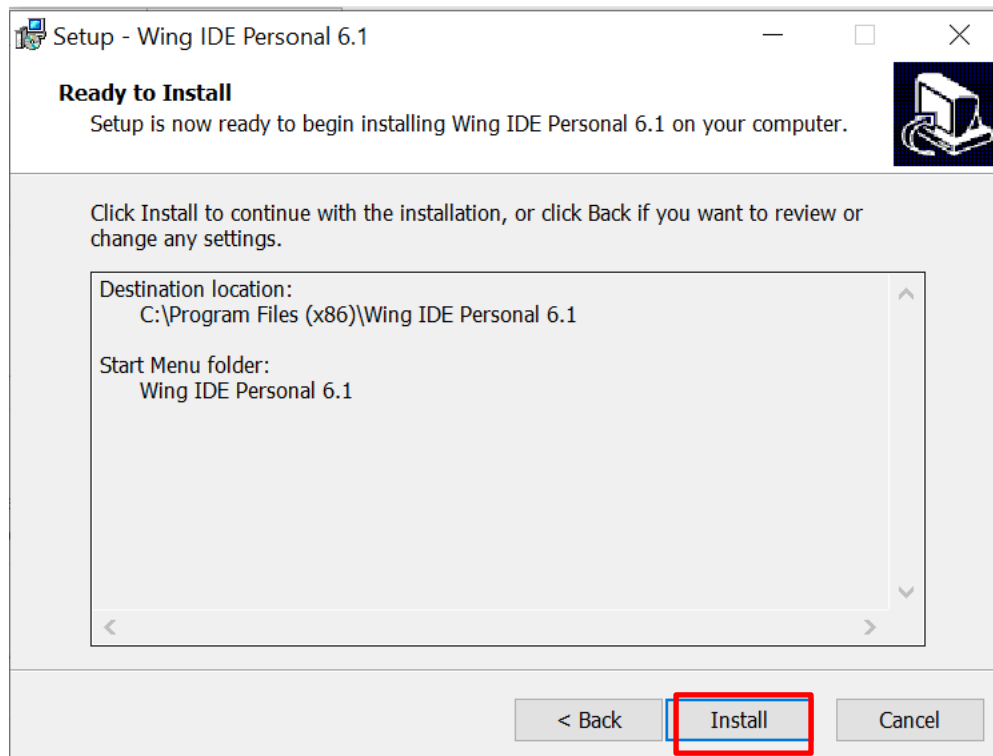

Click on "I accept..." radio button, then click NEXT button.

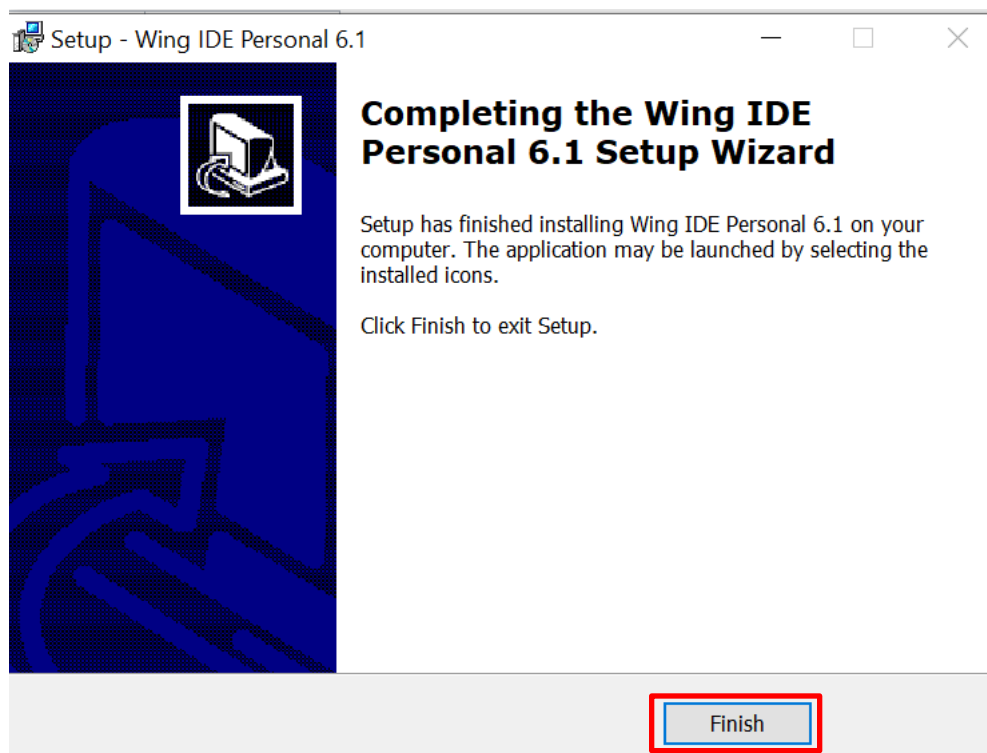

Do not change the folder. Click NEXT.

Click NEXT

Click INSTALL. The installation will start. Wait patiently for the installation to complete.

Click FINISH.

## Using Wing Personal Python IDE

- a) To Launch the Wing IDE Personal 7.2, Click at Windows Start button  in bottom left of your computer. Search for the program by typing “Wing IDE 101” (Partial entry may work). Click on the program “**Wing IDE Personal 7.2.3**” in the results list.
- b) At the Wing IDE application window, click  “Create New File” Icon or Select Menu option “FILE > NEW” to add a new Python Code File (you will see a new tab “untitled-1.py” created for the new file). To manage the Tool box windows at the bottom, you can click at the icon  and a menu will appear to choose the settings you wanted. For each of the tool box windows (represented by the tabs), you can click the  button for more actions applicable for that particular tool box.
